

Workshop Scenarios

This document shows some of the demo scenarios that you'll see as part of your workshop. Please note that Magic deployment architectures are *not limited to what you see here!* You have total flexibility to deploy a combination of Magic application servers and clients, integrated with your existing systems.

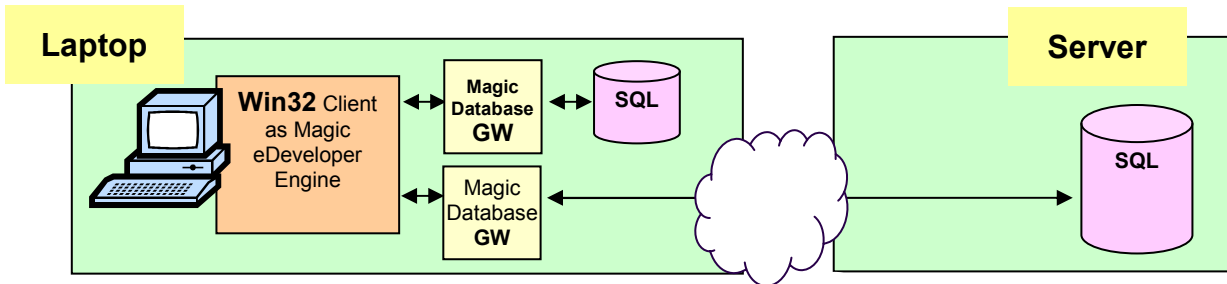

Scenario No. 1: Win32 client to local SQL database

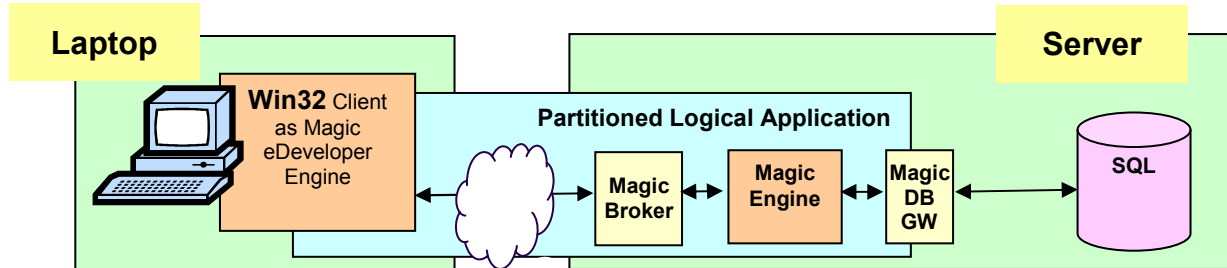

Scenario No. 2: .NET client to local SQL database

Scenario No. 3: Local Win32 client to remote SQL database on Server

Scenario No. 4: Local Win32 client to remote SQL database & partitioned application

More Scenarios

Scenario No. 5: Browser client accesses Magic hosted Web service

Scenario No. 6: Server application accesses COM or EJB component
